Dear Hiring Team,

I am writing to express my strong interest in the Emerging Talent Software Engineer program. This opportunity resonates deeply with my personal journey of transitioning into software engineering while balancing full-time work and continuous education.

Over the past few years, I have been actively self-studying front-end development and have built projects using JavaScript, React, and related technologies. To strengthen my computer science foundation, I enrolled in credit-bearing engineering courses at the University of Colorado Boulder, where I completed programming and algorithms coursework while working full-time.

Because I need to continue working while advancing my education, I applied to the Georgia Tech OMSCS program, and I am proud to share that I have been admitted for the Spring 2026 term. I plan to take one course per semester, ensuring that I can maintain excellent performance at work while making consistent long-term progress toward my master's degree. My experience studying at CU Boulder while working full-time has already proven that I can manage both responsibilities effectively.

Currently, I work at Bank of America as a customer service representative, where I have developed strong analytical, communication, and problem-solving skills in a fast-paced environment. When I learned about JPMorgan Chase's Emerging Talent program, I was truly excited. It represents the exact type of environment where I can grow—combining professional software engineering training, hands-on experience, and long-term career development.

I am highly motivated to join this program because it would allow me to:

- learn from experienced engineers,
- contribute to real-world technical projects,
- and continue my OMSCS degree without impact on my full-time work, as I study only during my personal time on weekends or evenings.

I am confident in my ability to succeed because I have already demonstrated my commitment through years of self-learning, completing university-level CS courses while working, and consistently pushing myself to grow. I am eager for the chance to bring my dedication, curiosity, and work ethic to JPMorgan Chase as part of the Emerging Talent Software Engineer cohort.

Thank you for your time and consideration. I would be grateful for the opportunity to interview and further demonstrate my passion and potential.

Sincerely,
Victoria Li
